

Interactive Whiteboards in the Classroom

Are your Interactive Whiteboards being used to their full potential?

Or as just an expensive space to show PowerPoint presentations ?

We can show you how to put the "Interactive" into your whiteboard, using the whiteboard software and our simple time saving lesson ideas and templates.

Sessions from beginner level to advanced or subject specific - Science, English, Maths, PHSE, Languages, Humanities, SEN/D and on all brands of boards. We can also incorporate use of scanners, DVD players, visualisers or webcams if you have those available for use.

Sessions can be run from a 90 minutes overview or refresher session to a whole day where delegates will also have the chance to create their own resources. Training will be hands on using the IWB and preferably with delegates having access to the whiteboard software on computers or laptops.

We can also run sessions specifically for those working in EYFS and KS1 and Post 16.

Sessions available for Smart, Promethean, Easiteach or Hitachi Starboard software.

Email now info@ict-connections.co.uk for your no obligation quote or to speak to one of our trainers about your requirements.
