

Interactive Whiteboards in the Meeting, Training or Boardroom

Are your Interactive Whiteboards being used to their full potential?

Or as just an expensive space to show PowerPoint presentations ?

We can show you how to put the "Interactive" into your whiteboard. Delegates will learn how to interact with PowerPoint, Word, Excel files or other software using the built in whiteboard tools.

They will explore the flipchart or notebook software that comes with the board and learn how to integrate the whiteboard software into meetings. We can also incorporate use of the Internet, scanners, DVD players, visualisers or webcams if you have those available for use. We will look at options for using with guest presenters and their laptops.

Sessions from beginner level to those wanting to use the IWB software to prepare meetings and presentations and on all brands of boards.

Sessions can be run from a 90 minutes overview or refresher session to a half day where delegates will also have the chance to create their own resources. Training will be hands on using the IWB.

We can also run Train the Trainer whole day sessions where delegates who already have a good working knowledge of the board can learn the more advanced features and develop and organise demonstration materials relevant to their workplace and so be able to deliver training to colleagues

Sessions available for Smart, Promethean or Hitachi Starboard software.
Email now info@ict-connections.co.uk for your no obligation quote or to speak to one of our trainers about your requirements.
